

David Popa

Data Architect – Azure Data & Analytics

david.popa@bearingpoint.com | +40 785 456 012 | Bucharest, Romania | [linkedin.com/in/david-popa-data](https://www.linkedin.com/in/david-popa-data)

PROFESSIONAL SUMMARY

Data Architect with 9+ years of experience designing and building enterprise data platforms on Microsoft Azure and on-premise stacks. Expert in the Azure Medallion Lakehouse architecture (ADLS Gen2, Databricks Delta Lake, Synapse Analytics), Power BI semantic modelling, and DataOps pipelines. Delivered end-to-end data platforms for agri-business and financial services clients, reducing monthly reporting times from days to minutes and enabling group-level analytics across multiple countries. Certified Azure Data Engineer Associate and Databricks Data Engineer.

WORK EXPERIENCE

BearingPoint *Bucharest, Romania – 2021 – Present*

Data Architect

- Designed and built Azure Data Lakehouse (Bronze/Silver/Gold Medallion) for EuroAgro International: 7 source systems, 5 countries, 87 data entities catalogued in Microsoft Purview; reduced monthly report generation from 3-4 days to 45 minutes.
- Built and optimised 14 ADF pipelines including SAP BSEG extraction (200M+ rows): implemented partitioned extraction with parallelism reducing runtime from 18 hours to 3.5 hours.
- Implemented Azure Event Hubs micro-batching layer for 50,000 IoT events/hour from agricultural silo sensors, decoupling real-time data from batch ELT pipeline.
- Designed Power BI semantic model with 47 DAX measures; delivered 12 dashboards used daily by 78 users across 5 countries.
- Implemented data quality rules with Great Expectations and CI/CD pipelines for Databricks notebooks via Azure DevOps and Terraform.
- Configured Microsoft Purview data catalog with automated ADLS/Synapse scanning, lineage tracking, and GDPR PII auto-classification.

ING Tech Romania *Bucharest, Romania – 2017 – 2021*

Data Engineer

- Built Python/PySpark ETL pipelines on Azure Databricks for regulatory reporting (FINREP, COREP) submitted to the National Bank of Romania.
- Implemented Apache Kafka consumer pipelines for real-time transaction monitoring, processing 2M+ events per day.
- Designed star/snowflake schemas in Oracle 19c and PostgreSQL for the risk management data warehouse.
- Developed Power BI dashboards for Risk and Finance teams covering liquidity ratios, credit exposure, and capital adequacy metrics.

Endava Romania *Bucharest, Romania – 2014 – 2017*

.NET Developer

- Developed data access layers in C# (Entity Framework, Dapper) for enterprise document management applications.
- Built SSIS packages and SSRS reports for a SQL Server-based operations analytics system.
- Participated in SQL Server 2012 to PostgreSQL migration project: schema conversion, stored procedure rewriting, and data validation.
- Implemented unit and integration tests using NUnit and Moq, maintaining 85% code coverage.

EDUCATION

M.Sc. in Data Science & Machine Learning – Politehnica University of Bucharest – 2019

B.Eng. in Computer Science – Politehnica University of Bucharest – 2014

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Databricks Certified Data Engineer Associate
- Microsoft Power BI Data Analyst (PL-300)
- Microsoft Certified: Azure Fundamentals (AZ-900)

TECHNICAL SKILLS

Azure Data Platform: ADLS Gen2 · Azure Data Factory · Azure Databricks · Azure Synapse Analytics · Delta Lake · Microsoft Purview

Analytics: Power BI (DAX, Power Query, Semantic Models) · Azure Analysis Services · Excel (advanced)

Programming: Python (PySpark, pandas, Great Expectations) · SQL (advanced) · Scala (basic) · C# (mid-level)

DevOps & IaC: Terraform · Azure DevOps CI/CD · Git · Apache Kafka · Docker (basic)

LANGUAGES

Romanian: Native

English: C2 – Proficient

German: A2 – Elementary
